1 stall = \$165 for up to four nights even if only stayed in for one night. The easy way to figure your stall cost is to multiply the number of horses you have times \$165. For every night your horses stay in their stall past the fourth night, add \$35. Example: 2 horses staying the whole time = 2 x \$165 = \$330 (both horses for four nights) plus \$35 x 2 horses x 2 extra nights = \$210. Total = \$330 + \$210 = \$520 for 2 horses for 7 total nights.
